HORTONWORKS

SAND BOX HDP2.6.5

**NEW TO HDP**

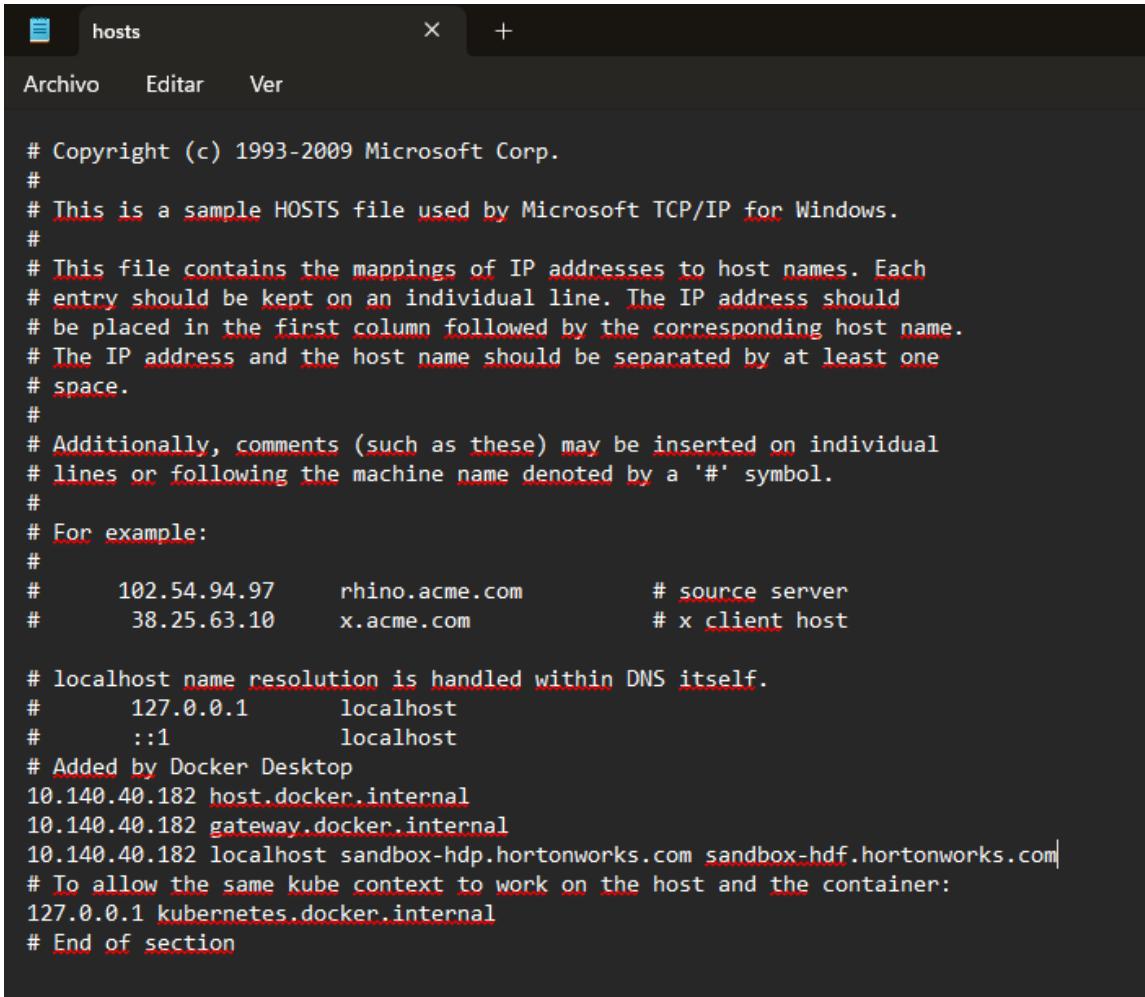

**Explore the Hortonworks Data Platform (HDP)**  
Walk through a typical use case with the tutorial

**LAUNCH DASHBOARD**

**ADVANCED HDP**

**Expand your Hortonworks Data Platform (HDP) experience**  
Access components in Sandbox

**QUICK LINKS**

```

hosts          X  +
Archivo   Editar   Ver

# Copyright (c) 1993-2009 Microsoft Corp.
#
# This is a sample HOSTS file used by Microsoft TCP/IP for Windows.
#
# This file contains the mappings of IP addresses to host names. Each
# entry should be kept on an individual line. The IP address should
# be placed in the first column followed by the corresponding host name.
# The IP address and the host name should be separated by at least one
# space.
#
# Additionally, comments (such as these) may be inserted on individual
# lines or following the machine name denoted by a '#' symbol.
#
# For example:
#
#      102.54.94.97    rhino.acme.com        # source server
#      38.25.63.10    x.acme.com            # x client host

# localhost name resolution is handled within DNS itself.
#      127.0.0.1    localhost
#      ::1          localhost
# Added by Docker Desktop
10.140.40.182 host.docker.internal
10.140.40.182 gateway.docker.internal
10.140.40.182 localhost sandbox-hdp.hortonworks.com sandbox-hdf.hortonworks.com
# To allow the same kube context to work on the host and the container:
127.0.0.1 kubernetes.docker.internal
# End of section

```
